Azam IT Launches New Voice Recording and Storage System

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will provide bank managers with a new communication tool for the office.

*"Azam isn't just a management tool for recording internal branch management meetings," says inventor **Andronicos**. "It's also a very useful method to record phone requests such as cancelling cheques and providing information to the branch."*

The reaction from bank managers has been overwhelmingly positive, as the messaging system not only eliminates misunderstandings, but is also invaluable as a management tool in the office. As one bank manager put it, *"When I came across **Azam** I immediately saw its potential as a low-cost, low-resource way to ensure my team had an additional way to communicate with each other and to ensure our customer requests were carried out quickly and efficiently. Furthermore, we never have to waste our time taking meeting minutes any more. The great thing about **Azam** is that it's so simple, yet you can do so many things with it!"*

Azam allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)
Windows 98, ME, 2000 or later versions
Sound card and Microphone (free with despatched version)
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from www.azamit.com. It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at www.azamit.com, or by post from:
