Azam IT Launches New Voice Recording and Storage System

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will enable children to voice email their friends and relatives at no cost worldwide.

*"Azam, is family software," says inventor **Andronicos**. "It is a novel, online communication tool which can be used at its simplest level to record messages or as a sophisticated online editing suite. Since it works with your voice, typing skills are not necessary, - now **all** can join in the fun of **online** messaging."*

Children have been overwhelmingly enthusiastic over **Azam**, being able to really "speak" to friends by voice email is the greatest attraction. *"It's really good fun. My friends have it and I can even voice email my Grandma abroad."* And parents agree, *"it fulfills all of the requirements; it's educational and achieves the impossible in that it encourages my children to keep in touch with their relatives - cheaply."* There is even a pre-installed game to play whereby children can have fun "interviewing" family and friends and then mischievously replacing the questions asked after the event!

Azam allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)
Windows 98, ME, 2000 or later versions
Sound card and Microphone (free with despatched version)
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from www.azamit.com. It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at www.azamit.com, or by post from:
