## **Azam IT Launches New Voice Recording and Storage System**

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will greatly assist journalists and writers in their work.

*"Azam helps writers to manage information," says inventor **Andronicos**. "They can dictate articles for transcription from anywhere in the world to numerous sites. Send voiced, explanatory, supportive or persuasive attachments to emails and rest easy that their words are stored and filed for future reference. Their interviews can be edited, downloaded and despatched to one or many studios, whether they were held over the phone, recorded into a tape recorder or around the PC."*

The reaction from those in the field has been overwhelmingly positive as the messaging system not only helps with the stress of speedy transcription but also supports the integrity of the interviewer. As one freelance journalist explains, *"Journalists on the move can voice mail a story for transcription, to anywhere in the world, in one format or in multiple, edited versions without losing a record of their content. Even our legal department can be emailed a section of an interview my editor seeks advice on before publishing."*

**Azam** allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)  
Windows 98, ME, 2000 or later versions  
Sound card and Microphone (free with despatched version)  
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from [www.azamit.com](http://www.azamit.com). It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at [www.azamit.com](http://www.azamit.com), or by post from:
