Azam IT Launches New Voice Recording and Storage System

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will revolutionise working practice for management consultants.

*"From now on," says inventor **Andronicos**, "consultants have, at their disposal, another medium in which to communicate with their clients. **Azam** will revolutionise how they correspond by replacing online text with online voice. Instead of just letters or emails, proposals will have voice mail attachments introducing the spoken ideas of the consultants. In the place of jotted notes consultants will send voice mails that retain the persuasive tone of the sender."*

The reaction from professionals has been overwhelmingly positive: **Azam** helps to manage the client relationship, tracking of all meetings and calls with the client, and it can also improve the service provided. One London consultant gave this example: *"A lot of my work focuses on human resources. As an outsider, my clients' employees perhaps feel more at ease talking to me. When I came across **Azam** I thought it would be useful for recording interviews at client sites. And it certainly is - no note-taking, attention firmly focused on the person in front of me... What I hadn't thought of was using it for presenting my findings to the client. I inserted edited parts of the recordings into my presentation to clarify and justify the recommendations I was making. Well, it literally brought the presentation to life! The client has commissioned another piece of work, and I am certain **Azam** was partly why."*

Azam allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)
Windows 98, ME, 2000 or later versions
Sound card and Microphone (free with despatched version)
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from www.azamit.com. It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at www.azamit.com, or by post from:
