Azam IT Launches New Voice Recording and Storage System

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will empower police forces and law enforcement agencies with an innovative software tool.

*"Azam can help police forces from day one of implementation," says inventor **Andronicos**. "When formally questioning suspects or taking witness statements, the proceedings can be recorded straight onto a PC, indexed, stored and emailed in whole or in part to interested parties such as the Department of Public Prosecutions."*

The reaction from police forces is expected to be overwhelmingly positive as the recording system not only acts as a central database repository of all interviews, but also allows officers to pre-load common interview questions and scripts. Using this unique technology, the listener will be able to easily search for critical interview segments. Although **Azam** is not designed as a replacement for conventional dual tape recording methods, it is certainly an invaluable cost effective technology tool for every police station.

Azam allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)
Windows 98, ME, 2000 or later versions
Sound card and Microphone (free with despatched version)
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from www.azamit.com. It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at www.azamit.com, or by post from:
