Azam IT Launches New Voice Recording and Storage System

Software designers and distributors **Azam International Technologies** have launched their new voice recording, dictation and distribution system that, they say, will revolutionise working practice for PR and advertising agencies.

*"Azam is attention grabbing," says inventor **Andronicos**. "It uses the power of voice online, allowing advertising and PR agencies to personally contact clients or their client's customers internationally in their tens or thousands - instantly. A voice message can be sent on its own or attached to a conventional email to bring the visual alive."*

The reaction from companies has been overwhelmingly positive as the messaging system not only introduces a persuasive communication avenue but also gives both clients and agencies much needed back-up. As one Account Director put it, *"One of the difficulties we face is offering an immediate turn around to clients and the press. With **Azam**, we now have the facility to analyse client discussions and interviews, download those segments to groups of our creative staff anywhere in the world and keep stored copies of our despatches. What's more, it's different and is very efficient!"*

Azam allows meetings and face-to-face discussions to be recorded, stored and emailed in whole or in part. Ancillary uses include a voice diary and phone function that records conversations or messages. These too can be edited and emailed. Additionally, a fully functional answer phone system is included.

Users need only have:

*A PC (not yet available for Apple users)
Windows 98, ME, 2000 or later versions
Sound card and Microphone (free with despatched version)
Hard disk space for stored recordings*

The phone recording and answer phone functions require a V92 voice modem (Standard on many new PC systems). For those who need to upgrade, or who have laptops, V92 voice modems are available at leading computer retailers.

The amazing **Azam** can be downloaded **free** from www.azamit.com. It is simple to install and very easy to use. It is free to use for the first 30 days. Thereafter, most users pay a one-off registration fee of just £29.99. Under the Azam Disabilities Initiative (**ADI**) however, users with disabilities qualify for a free copy from any charity (NGO) taking part in the initiative.

Alternatively, a boxed package complete with user manual and quality condenser microphone can be ordered for £49.99. Orders can also be placed through the website at www.azamit.com, or by post from:
